○ akinbezatoglu

Profile

As a young, solution-oriented engineer with a strong passion for software development, a solid foundation in cloud technologies and the **.Net ecosystem**, and a proactive approach to problem-solving, I am enthusiastic about leveraging my skills and energy to add value to any organization. I am excited to collaborate with teams to drive innovation and achieve business objectives.

Projects

Atlas — Kanban-based project management application   *atlas* ☑

- Atlas enables users to manage projects, create tasks, and assign tasks to members in a unified workspace
- Tools Used: Next.js, TypeScript, Hono.js, Shadcn/ui, Tailwind CSS

BlogRealm — MVC project   *blog-realm* ☑

- An ASP.NET MVC project designed with SOLID principles and a layered architecture, leveraging Repository Pattern and Code First approach to enable authors to effortlessly create, manage, and explore blogs
- Tools Used: C#, ASP.NET, Entity Framework, SQL Server

Survey Builder   *survey-builder* ☑

- A full-stack survey management application enables users to create and customize surveys according to their preferences and needs.
- Tools Used: Golang, MongoDB, JavaScript, Huawei Cloud

Education

Huawei Cloud   *Remote*
Practicum in Cloud Computing   *Nov 2022 – Jan 2023*

- The core concepts of cloud computing—including IaaS, PaaS, SaaS, virtualization, storage, networking, and security—cloud-based application architectures and scalability were covered. (see Survey Builder)
- My Huawei Cloud Practicum Experience ☑ and Provisioning VPC-Peering on HUAWEI CLOUD using Terraform ☑ on Huawei's Developer Forum

Aydın Adnan Menderes University   *Aydın, Türkiye*
B.Sc. in Computer Engineering, 3.56/4.0   *Sept 2017 – Aug 2022*

Experience

Research and Development Engineer, Internship   *Aydın, Türkiye*
The Scientific and Technological Research Council of Türkiye (TÜBİTAK)   *July 2022 – Sept 2022*

- Acquired valuable experience in collaborative teamwork within multidisciplinary settings, engaging with professionals across diverse engineering domains such as electrical, electronics, and textile

Internship   *İstanbul, Türkiye*
The Presidency of the Republic of Türkiye Human Resources Office   *Aug 2021*

- A full-stack application developed with Golang for the RESTful backend and utilizing MongoDB as the database (see Project: Survey Builder)

Technologies

Languages: C#, SQL, Golang, JavaScript

Technologies: .NET, Microsoft SQL Server, Entity Framework, Git, React

Certifications

AWS Certified Cloud Practitioner ☑   *Issued on Dec 2022*
